ISO 14001

Environmental management system.

ISO 45001

Occupational Health & Safety

Sedex member

Ethical trade, labor rights & responsible practices.

Three Star Export

Recognized by DGFT

REACH Compliance

EU-certified safe chemical use.

California Prop 65, BIS, TBS

Meets US, Indian & Tanzanian standards.

ECE-R88 + ECE-R75 Certified

European safety & performance standards.

ETRTO, ISO 5775

International tyre standards compliance.

World-Class Manufacturing. Built to Global Standards.

Equipment

Automated
Calendering Machine, Mixers
Extruders, Tyre Building Machines,
Curing Units

Capacity

Designed for **large-scale** production.

Quality

Best in class for product **quality and efficiency**

Automation

Automated
Pneumatic Manufacturing Lines

Layout

Optimized flow to improve **safety**.

ESG & SUSTAINABILITY

Cycling towards endless possibility - Responsibly

Sourcing nature, shaping the future.

Sustainable complaint natural rubber
Bio-based rubber & silica
Recycled polyester
Eco-friendly additives

Hartex Circular Tech

Retreading & reuse
Scrap rubber to smart applications
Wood waste upcycled
Reclaimed rubber, reduced footprint

Eco Smart manufacturing

Rice husk biofuel
Low-carbon energy
Eco-clean mould technology
NitroCure Technology

Moving sustainably Delivering reliably

Smart, seamless warehousing
Eco fleet in motion
Lower emissions every mile
On-time, lighter-footprint delivery

Engineered for Performance

Low Rolling Resistance
Superior traction in wet conditions
More miles. Less wear
Lighter tyres, stronger rides

1 MW Solar
powering our future

Water recycled
nothing wasted

Zero Liquid Discharge
zero compromise

Repurposed tubes
zero waste

Dry Ice Cleaning
zero chemicals, total precision

Wood waste
reimagined as furniture

NitroCure
smarter, greener tyre curing

XTREME I ^{TR}

The **Xtreme I** tyre is an MTB tyre that is built for loose terrains like dirt paths, sand and light natural trails. The tyre is made from robust materials and designed to withstand the wear and tear of the undulated outdoors, so you have a comfortable ride even when the paths you're taking are tricky.

ETRTO	SIZE	TYPE	TPI	BEAD	COLOUR	WEIGHT (g)
57-622	29x2.25	Skinwall/Tanwall	60	Aramid	Black/Beige	730

TECHNOLOGY

MAXIGRIP™

Developed by Hartex R&D, MaxiGrip™ uses a unique blend of polymers, fillers, and chemicals to deliver the ideal balance of grip, rolling efficiency, comfort, and durability — ensuring high-performance rides across every terrain.

PUNCTURE GUARD™

Puncture Guard™ tires are designed to prevent flats, so you can enjoy your ride. We use a combination of advanced technologies, including a high-quality rubber compound, extra textile layers, a high TPI count, and a protective rubber belt to keep you riding smoothly.

The tubes with self-sealant are available for all the sizes. Wall Thickness 1.2mm

RIM TAPES

PVC RIM TAPES are available for all the dimensions.
STANDARD WIDTHS 18/14 mm, THICKNESS 0.7 mm, HOLE DIAMETER 8 mm.

TUBES

Precision Extrusion Technology

Uniform wall thickness and accurate gauge control for consistent performance.

High-Purity Butyl Compounding

Enhanced air retention and long-lasting durability.

Automated Splicing & Valve Bonding

Stronger joints and secure valve adhesion for leak resistance.

Advanced Testing & Quality Control

Every batch validated for burst strength, air retention, and dimensional accuracy.

Efficient & Sustainable Processes

Energy-optimized curing systems for reliable and eco-conscious production.

Available in all sizes and weights as per customer requirement

Uniform extrusion for consistent sizing

High-purity butyl for superior air retention

Precision splicing to prevent slow leaks

Strong valve bonding for durability

Rigorous in-house testing for reliability

Hartex SealPro

Self-Sealant Inner Tube

Hartex introduces its latest innovation – the Self-Sealant Inner Tube – designed to give riders unmatched confidence on every journey. Engineered with advanced sealant technology, this inner tube automatically seals punctures as they happen, ensuring that your ride continues without compromise.

How it works

- The inner tube comes **pre-filled** with a high-performance sealant gel.
- If the tyre is punctured, the **sealant** instantly flows to the **damaged area** and seals the leak.
- Even when an external object is removed, the **gel re-seals the hole seamlessly**, maintaining consistent tyre pressure and performance.

Key benefits

- Instant puncture protection on the go.
- No compromise on tyre performance.
- Longer, worry-free rides.

PACKAGING

Pouch Packing

Box Packing

Biscuit/pouch packing and box packing options are available for all tubes. The packing artwork can also be customized.

VALVES

REACH Compliance

EU-certified safe chemical use.

Type Italian Valve
Metal Coating Nickel

Type Dunlop Valve
Metal Coating Brass / Nickel

Type American Valve
Metal Coating Brass / Nickel

Type French Valve
Metal Coating Brass

Type American Valve (Rubberised)
Metal Coating Brass / Nickel

Type German Core / Easy Pump Core Valve
